

PACIFIC ISLANDS PROGRAM

University of Hawaii

Miscellaneous Work Papers

BIBLIOGRAPHIES OF the KERMADEC ISLANDS, NIUE,
SWAINS ISLAND and the TOKELAU ISLANDS

William G. Coppel

(1975: 2)

Foreword

These bibliographies are published as a workpaper by the Pacific Islands Studies Program to assist a wide range of research in the area of Pacific studies. The bibliographies originated with Dr. W. G. Coppel, Lecturer in Education, Macquarie University, whose recognition of the need for such materials and whose familiarity with the islands felicitously coincided. His compilation of the references to written works on the Kermadecs, Niue, Swains Island and the Tokelau Islands testifies to his dedication.

The editor thanks those members of the University of Hawaii Manoa faculty and library staff whose assistance was so necessary in putting these materials in publication form, particularly Miss Renee Heyum, Curator of the Pacific Collection, without whose skill, knowledge and forbearance, this project could never have been completed.

In addition to the cooperation of the Pacific-oriented members of the University of Hawaii Manoa scholarly community, a grant from the U.S. Office of Education has also helped make this publication possible.

Mr. Noel L. H. Krauss, of Honolulu, has most generously consented to the inclusion into this work of bibliographic entries from his relevant works on Niue, Swains Island and the Tokelau Islands. Those items are marked throughout with an asterisk. Dr. Coppel's compilation of references to the Kermadec Islands is the first of its kind.

PREFACE

Arrows on the preceding map indicate the general geographical location of the island subjects of these bibliographies.

The Kermadec Islands were discovered by French explorer d'Entrecasteau in 1793. The group has no indigenous population. Now a dependency of New Zealand, its present inhabitants are largely staff members of the air department of New Zealand.

Niue was discovered in 1775 by Captain James Cook. It was transferred to New Zealand administration by Great Britain in 1901. It gained self government and free association with New Zealand in 1974. Its 1970 population was 5,303.

Swains Island was discovered by Captain Swain, master of an American whaling ship. Geographically, it constitutes a part of the Tokelau Islands, but was annexed by the United States in 1925 and is administered by the U.S. as part of American Samoa. Its 1970 population was 74.

The Tokelau Islands were discovered by Commodore Byron of the British Navy in 1765. They came under New Zealand administration in 1926 and in 1970 had a population of 1,687.

Many abbreviations are used throughout this work. The most commonly used ones are not included in the following list:

Anthro.	Anthropological	LMS	London Missionary Society
